

Fase 1: Fietsbrug Noord onderbroken

The left map, titled 'Fietsomleiding werf Willemen', shows a detour route for cyclists around the broken bridge. The route starts at the intersection of the main road and the bridge, goes south along the main road, then east along the main road, and finally north along the main road to the destination. The right map shows the bridge closed with a large 'X' and the resulting traffic congestion on the main road. The map includes various landmarks such as the Arboretum van Groenendaal, the B&B Hippodrome, and the ANB Regio Groenendaal. It also shows the location of the broken bridge and the detour route for cyclists.

An aerial photograph showing a construction site. A road or bridge structure is visible, with a yellow arrow pointing to a section labeled '100m'. The surrounding area is heavily forested with green trees. In the foreground, there are some buildings and construction materials.
